Authors: Rudolf H. Moos & Edison Trickett. The Classroom Environment Scale (CES) helps create a positive school climate. The 2002 Third Edition Manual is extensive, and has been used in educational settings. Let us do the work!

Publication » The Family Environment Scale: Resolving Psychometric Issues

ABSTRACT The factorial structure of the Family Environment Scale (FES, Moos & Moos, Manual for the ASEBA adult A Systemic Assessment of the Family/Business System) has been a focus of research. Using the Family Environment Scale and the Work Environment Scale.

Get this from a library! Work environment scale manual: development, applications, research. (Rudolf H Moos)

In contrast with previous work in this area, the current analyses consider heterogeneity in the Family Environment Scale-Second Edition (FES, Moos & Moos, 1986) at T1. Scales of Independent Behavior - Revised (SIB-R) are used to assess the family environment.

ABSTRACT Previous research into stress in nursing has identified different sources of stress for different specialties without specifying the source of that stress. In the 1970s, the work by Moos (Moos, 1973, 1977) and Walberg (1984) led to the development of the Work Environment Scale: Palo Alto, CA: Consulting Psychologists. In contrast with previous work in this area, the current analyses consider heterogeneity in the Family Environment Scale-Second Edition (FES, Moos & Moos, 1986) at T1. Scales of Independent Behavior - Revised (SIB-R) are used to assess the family environment.

The Family Environment Scale-Second Edition (FES, Moos & Moos, 1986) is used to assess the family environment. The Self-Report Index of Social Behavior (SIB-R) is used to assess the family environment. The Self-Report Index of Social Behavior (SIB-R) is used to assess the family environment.

Work Environment Scale (Moos & Insel, 1974). Specific areas of concern include work environment variables such as order and control, social support, efficacy, and so-called WES Work Environment Scale concern- ing social support. of the working environment (Moos, 1986).
